

Product Description & Application

Kizzexx EP-2 is a general-purpose lithium grease formulated to provide protection against wear, corrosion and water washout. Available as an NLGI 2 grade with a base oil to address a variety of both industrial and commercial vehicle applications. EP-2 is recommended for most types of industrial applications including heavy duty applications where high unit pressures or shock loads are present. The grease provides good protection against rust and corrosion and resist water wash-out. Waxity EP-2 is also suitable for commercial vehicle and construction equipment applications such as chassis joints and pin bushing lubrication.

Features & Benefits

- Reduced wear under heavy or shock loading and vibration for equipment reliability.
- Protection against rust and corrosion and resistance to water washout.
- Cost effective performance in applications where frequent re-greasing is necessary.
- Provides excellent load bearing capacity.

Meets Or Exceeds

- NLGI-2

Typical Characteristics

TEST	METHOD	RESULT
NLGI Grade	-	2
Soap Type	-	Lithium Complex
Viscosity Of Oil @100°C, cSt	ASTM D 445	18
Viscosity Of Oil @40°C, cSt	ASTM D 445	105
Worked Penetration @25°C	ASTM D 217	275
Drop Point, °C	ASTM D 2265	195
Water Washout, @79°C	ASTM D 1264	<10
Copper Stripe Corrosion,	ASTM D 4048	1B
